

# EZSIT Leaning Stool

The EZSIT Leaning Stool from ErgoVerse offers a larger-than-average seating surface, combined with extra cushioning for superior comfort during long work sessions. The heavy-duty, large diameter tubular steel base is equipped with an infinitely-adjustable gas spring which permits the seat to absorb the impact when you sit down, reducing compression on your spine. The gas spring continues to cushion as weight is shifted throughout the day.

The large 18.7" by 13" seat tilts from 0° to 15° to accommodate both sitting and leaning positions. Models ELS-B-11122 & ELS-B-S-11128 include a matching, heavily padded oversized back with a shallow curvature to accommodate broad-backed individuals. Independent angle and height adjustments on the back of these models ensure that a comfortable upright posture can be maintained regardless of the chosen seat angle.

Two ranges of seat height adjustment are available to provide seating options for people ranging in height from 5' tall to 6'6" tall. Users up to 5'9" tall should consider model numbers ELS-B-S-11128 or ELS-S-11129 (seat height ranges from 24" to 31"). Users who are between about 5'6" tall to 6'6" tall should consider model numbers ELS-B-11122 or ELS-11123 (seat height ranges from 28" to 37").

Part #	Seat Material	Seat Height	Back Rest	Color
ELS-B-11122	Leatherette over 2" PU Foam	28" - 37"	YES	Black
ELS -11123	Leatherette over 2" PU Foam	28" - 37"	NO	Black
