

# FYLDST Foldable Leaning Stool

The FYLDST Foldable Leaning Stool from ErgoVerse offers users the opportunity to sit or lean while working. In addition to reducing the weight load and stress on the joints of the legs, this posture also lets users quickly move back to a fully standing position with minimal effort.

Designed with portability in mind, at only 14.3 lbs the FYLDST enables users to easily move their chair with them between locations or job sites. This stool offers an extended range of seat height adjustment from 21.25" to 35.4" which will accommodate virtually every user and is rated to support 264 lbs. Heavy rectangular tube steel construction, simple folding hinges, and handwheel adjustment of seat height mean this chair will last through years of heavy use. The Formed Polyurethane fixed seat angles slightly

down at 10°, providing a comfortable resting place throughout the day. The textured surface of the seat facilitates airflow and makes the seat feel softer, improving comfort.

The simple design of this model results in a rigid seating position, with the only cushioning being that of the reasonably firm formed-polyurethane seat. Users looking for more cushioning or not requiring portability may wish to consider one of the numerous other models from ErgoVerse, with options of softer padding in the seats or gas spring cylinders for shock absorbance.

Part #	Seat Material	Seat Height	Back Rest	Color
FLS-F-11044	Self-Skinned PU Foam	21.25" - 35.4"	NO	Black

The FYLDST Foldable Leaning Stool comes with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
