

HYSIIT Saddle Seat

The HYSIIT Saddle Seat from ErgoVerse creates an upright posture that encourages upper body movement, better and deeper breathing, and improved overall circulation. This posture also enables greater reach and range of movement in the upper body, and makes it easy to return to a fully standing position.

The saddle stool design also creates a wider stance for the user, providing a secure seated position that offers relief to the joints of the legs and feet. The breathable fabric saddle seat tilts forward up to 15°, rotating the pelvis forward and resulting in a more natural and comfortable alignment of the back. The full 360° of free rotation enables users to swivel easily between work surfaces without the need to twist and turn at the waist. The stool can be positioned at any

height from 26" to 35.8", and the easily adjusted gas cylinder creates a cushioning effect that gives slightly when the user sits down, reducing the impact on the lower back.

Self-braking castors permit the stool to roll freely but will brake when the user stands up. This practical feature ensures that the seat remains in the same position the user leaves it. Long-wearing woven fabric over foam padding provides a breathable seat for better comfort.

Part #	Seat Material	Seat Height	Back Rest	Color
HSS-11216	Fabric over PU Foam	26.0" - 35.8"	NO	Black

All CITZ Saddle seats come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
