

# LOTAH

## Perching Comfort Saddle Seat

The LOTAH Perching Comfort Saddle Seat from ErgoVerse provides you with a position somewhere between leaning and traditional sitting. Straddling the saddle-shaped seat positions you higher than a chair and in such a way that upper torso movement is easily accommodated. Because the saddle seat bears your weight, your feet and legs are able to move and shift freely, eliminating fatigue in these areas and increasing circulation.

The LOTAH features a heavily padded 3" thick saddle style seat for comfort during extended work periods. The cushioning gas lift provides additional cushioning with movement, permitting the seat to absorb virtually all impact during movement or when mounting the saddle. The tilt function on the seat adds additional adjustment options for optimum comfort.

The design of the LOTAH places the heels behind the knees, permitting users to position themselves closer to workstations, especially where there may be a flat front or limited space for feet. This translates to better ergonomic positioning, with individuals being able to keep their elbows closer to neutral (i.e. below the shoulders) when working. The upright stance also encourages easier and deeper breathing than traditional seats and can lead to increased alertness on the job.

Part #	Seat Material	Seat Height	Back Rest	Color
LP-CSS-11126	Leatherette over 3" PU Foam	24.8" - 31.5"	NO	Black

All seats come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
