

# MVMNT Foldable Perching Saddle Seat

The MVMNT Foldable Perching Saddle Seat from ErgoVerse is a non-swiveling, foldable saddle seat designed for smaller or average sized users working at standard or elevated workstations. The saddle design keeps the toes approximately in line with the knees (rather than extended forward of the knees as they would be on a leaning stool), allowing users to sit as close as possible to a work surface built on top of base cabinets or shelves. The MVMNT keeps the torso in an ergonomically desirable upright position, while at the same time providing stability and reducing the need to bend forward from the waist. This posture is especially beneficial when fine control is needed or when greater effort must be exerted. The small back rest offers temporary support for users who like to lean back occasionally.

The height of the seat can be adjusted from 20.9" to 30.7" high. The height of the back rest adjusts independently to allow users to position support where it is needed. The seat and back rest are both padded for comfort and upholstered in black imitation leather for easy cleaning. The MVMNT features a foldaway adjustable-height foot-bar to provide a secure base of support when the chair is elevated.

The MVMNT features simple folding hinges, and easy handwheel adjustment of seat, back and footrest heights. The MVMNT is built on a sturdy, rectangular tube steel base. Rated to 264 lbs, but weighing only 18.7 lbs in total, the MVMNT can be easily transported between venues or job sites.

Part #	Seat Material	Seat Height	Back Rest & Foot Rest	Color
MPSS-F-11171	Leatherette over PU Foam	20.9" - 30.7"	YES	Black

All MVMNT Seats come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
