

RSTMOR Drafting PLUS Chair

**200 KG
Rating**

The RSTMOR Drafting PLUS Chair from ErgoVerse offers a height range that is suitable for use at a standard desk height as well as elevated counters or workstations. The large, comfortably padded seat and gently curving back support use 2" thick cushioning to provide comfort during extended periods of sitting.

The RSTMOR is intended to provide users with the option of eliminating weight bearing while working, especially at raised counters or workstations. Because it carries your weight, your feet and legs are able to move and shift freely, eliminating fatigue in these areas and increasing circulation.

The RSTMOR is designed with heavier users (up to 440 lbs.) in mind, featuring a sturdy double-tube steel frame construction that supports the large and heavily padded seat and backrest. A convenient fold-away and height-adjustable footrest is always available for when the seat is positioned too high for feet to properly contact the floor. Both seat and backrest height are adjustable so every user can find the position that best fits their build. The seat height range (21.7" to 30.3") makes the RSTMOR suitable for use at standard desks as well as elevated counters or workstations.

Part #	Seat Material	Seat Height	Back Rest	Color
RDPC-11190	Leatherette over 2" PU Foam	21.7" - 30.3"	YES	Black

All chairs come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
