

# SRLYN Perching Seat

The SRLYN Perching Seat from ErgoVerse features a heavy-duty, large diameter tubular steel base topped with a cushioning, infinitely-adjustable gas spring lift. Most stools are rigid and have no "give" when you sit on them. The gas spring on the SRLYN creates a cushioning effect where the lift absorbs the impact when you rest your weight, reducing compression on your spine. It continues to cushion as you shift your weight throughout the day. The convenient tilt option lets the seat be positioned flat for sitting or angled downward at the front from 5° to 20° for leaning. The attractive textured powder-coating resists marking and rust. Large nylon glides provide stable positioning and small rollers integrated into the rear feet will enable you to easily move the 18.7 lb (8.5 kg) seat between working points using the SRLYN's integrated handle.

The SRLYN Perching Seat features a firm, sealed polyurethane foam seat. The self-skinned seat is resistant to cuts and punctures, making it well-suited for deployment in warehouse or manufacturing environments. The height adjustment range is suited to users ranging from 5'2" to possibly up to 6'6".

Part #	Seat Material	Height Range	Color
SPS-11111	Self-Skinned PU Foam	26.4" - 35.8"	Black

All Stools come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
