

# STEYBIL Leaning Stool

The STEYBIL Leaning Stool is the ideal solution for you to sit or lean while working, and reduce the strain on the joints of both your legs and feet. The STEYBIL puts you in a more upright position, making it easy to return to a fully standing position with minimal effort. The seat offers a generous infinitely adjustable height range from 24" to 34", making it suitable for individuals of every height. The seat can also tilt forward from 5° to 20° and provides a full 70° of swivel range with an automatic return to centre.

Equally suitable for office or industrial settings, the textured black tubular steel base provides strength and stability in a small footprint that does not present a tripping hazard. Strong nylon glides engage the floor to ensure firm positioning of the seat, and the incorporated rollers permit the stool to be easily moved between workstations.

The STEYBIL comes with a variety of options for seat material to meet any environment. The SLS-PU-11147 uses a formed polyurethane seat which provides a firm yet cushioned seating surface with cooling airflow channels.

Part #	Seat Material	Color
SLS-LT-11144	Leatherette over PU Foam	Black/Blue
SLS-LT-11145	Leatherette over PU Foam	Black/Red
SLS-PU-11147	Self-Skinned PU Foam	Black
SLS-FB-11148	Fabric over PU Foam	Black
SLS-LT-11149	Leatherette over PU Foam	Black

This model is well-suited to environments where rough use may be encountered as the seat is resistant to cuts or punctures and can also be easily cleaned. There are three models (SLS-LT-11144/45/49) which feature a softer polyurethane foam base covered with an easily cleanable leatherette. Finally, the SLS-FB-11148 offers the same softer seat but with a breathable woven fabric cover for greater seating comfort.

All Stools come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
