

# TULEAN Leaning Stool

The TULEAN Leaning Stool from ErgoVerse features a heavy-duty, large diameter tubular steel base topped with a cushioning, infinitely-adjustable gas spring lift. Most stools are rigid and have no "give" when you sit on them. The gas spring on the TULEAN creates a cushioning effect where the lift absorbs the impact when you sit down, reducing compression on your spine. It continues to cushion as you shift your weight throughout the day. The convenient tilt option lets the seat be positioned flat for sitting or angled forward up to 15° for leaning. The attractive textured powder-coating resist marks and rust. Large nylon glides provide stable positioning and small rollers integrated into

the rear feet will enable you to easily move the 17.6 lb (8 kg) seats between working points.

The TULEAN Leaning Stool features a firm, padded seat with either a faux leather or fabric cover. Its appearance and comfortable cushioning make this model more suited to an office environment than others in this product family that are more fitted to a warehouse or manufacturing facility.

Two height ranges are available. Models 11114 & 11135 offer a range of 26" to 35.5" - suitable for users from about 5'2" to 6'6" in height. Models 11127 & 11136 have a seat height ranging from 22.5" - 29.5" and are best suited for users ranging from 4'5" to 5'5" tall. (Note: If there is a desire for a larger seat or thicker padding the EZSIT Leaning Stool is worth considering.)

Part #	Seat Material	Height Range	Color
TLS-LT-11114	Leatherette over PU Foam	26" - 35.5"	Black
TLS-LT-S-11127	Leatherette over PU Foam	22.5" - 29.5"	Black
