

# WTRFL Perching Seat

The natural flowing design of the WTRFL Perching Seat from ErgoVerse provides users with an angle-adjustable, contoured seating surface for both perching and leaning applications. The softly rounded front rises slightly to provide a "ledge" effect, keeping the user securely in position on the seat. The rounded waterfall front then drops down and away, eliminating uncomfortable sharp pressure lines against the back of the legs. The seat angle is adjustable from 0° to 14° allowing users to choose the most comfortable position and to further reduce the potential for a pressure point against the back of the thighs.

The firm polyurethane foam seat is waterproof and highly resistant to cuts or punctures. Formed channels facilitate cooling air flow. Height adjustment is accomplished with a gas spring that also serves as a shock absorber by providing a cushioning effect when the user sits down. A convenient handle is integrated into the back of the seat for ease of movement about the workspace.

Part #	Seat Material	Color
WPS-11351	Self-Skinned PU Foam	Black

WTRFL Perching Seats come with a 5 year limited warranty against defects in materials and workmanship under normal use and service.
