

DLADEM 3-D Laminated Waterfall Table Tops

The DLADEM 3-D Laminated Waterfall Table Top by ErgoVerse is a commercial grade table top with an organic design featuring rounded edges and corners. The highly resilient laminate film is vacuum applied at high heat to create a seamless 3-D laminated surface on the Waterfall edges and grommet holes. This softly contoured edge prevents any pinch points when working on the DLADEM, and reduces the risk for damage to cables when routing through either grommet hole. The resulting top surface is impermeable and extends to the hard melamine on the underside, preventing damage from humidity or liquid spills.

DLADEM Table Tops come in 4 luxurious wood grains (Dark Crimson Mahogany, Light Fresh Maple, Autumn Harvest Cherry and Pristine Sandbank) and 2 solid colors (Black and Grey). The MDF is sourced from spruce and pine sawdust from mills in Western Canada under the Sustainable Forestry Initiative. The primary tops are 29" deep, and come in four widths: 46", 58", 70", and 82". All tops include dual Waterfall grommet holes. The return tops are 23" deep and come in 41" and 53" widths. Return tops are not equipped with grommet holes. The DLADEM is compatible with most electric and manual sit-stand frames, including the ANDROMEDA Electric Workstation Base by ErgoVerse.

INSTALLATION INSTRUCTIONS:

When mounting the DLADEM to any base, use self-tapping wood screws that are no longer than 3/4", and pre-drill any holes using a drill bit that is the same size as the shank of the screw to reduce the risk of cracking or putting strain on the melamine.

Dark Crimson Mahogany	Autumn Harvest Cherry
	
Pristine Sandbank	Light Fresh Maple
	

All Table Tops come with a 2 year limited warranty against defects in materials and workmanship under normal use and service.

DLADEMs should not be exposed to high humidity environments or heating sources in excess of 70° C. Warranty does not apply to normal wear and tear or misuse of the product.
