

SAMA Palm Support

The SAMA Palm Support from ErgoVerse was designed with the low profile and narrow dimensions of compact keyboards and laptops in mind. At just 12" wide and 2" deep it will fit in front of virtually any keyboard, providing comfortable cushioned palm support while keyboarding without interfering with mouse movement. The low 0.5" profile virtually eliminates any potential for wrist extension to occur by elevating the palms to match the keyboard height.

The SAMA Palm Support features medical quality gel covered in stain-resistant fabric. Raised bumps across the surface create a 3-D effect that increases the cushioning effect and further improves the comfort. A reusable adhesive backing permits attachment to any hard, smooth surface as needed while still permitting easy removal and reattachment elsewhere. The SAMA Palm Support can be hand washed and air dried without damage to the adhesive. A quick application of rubbing alcohol will restore the adhesive backing if it loses its effectiveness.

The SAMA Palm Support is formed from medical quality gel with a Lycra fabric surface and backed with a reusable adhesive to keep the palm support in place. It is covered by a 180 Day warranty.

ErgoVerse SAMA Palm Support Specifications:

Width: 12" (30.5 cm)
Depth: 2" (5.1 cm)
Thickness: 0.5" (1.3 cm)
